

ADF PARIS

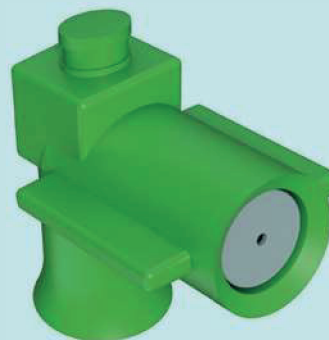

Lindal Mini Engine launch

LINDAL's Mini Engine Platform was launched at ADF Paris, where the company showcased its solution for improved packaging sustainability and getting new actuator designs to market quickly.

The platform concept separates a standard one-piece actuator into two parts; an outer body made from 100% post-consumer resin and an internal 'Mini Engine' designed for optimum spray performance.

Kashif Choudhry, product management and marketing at Lindal, commented: "ADF Paris was an outstanding show for us this year. We were honoured and delighted to pick up a joint award with DuPont's Performance Building Solutions, the second award for the Great

Sustainable. Flexible. Smart.

Stuff™ Smart Dispenser™ following a win at ADF New York just a few months ago.

"Attracting so many global industry representatives, ADF Paris is a key event for us, and the perfect platform to launch our newest innovations. This year, we introduced our new sustainable Mini Engine platform and our latest products, Olive and Teo.

"Our success at the show has left us with a busy schedule of discussions on some very interesting projects with existing customers and new prospects alike - we're already looking forward to next year's exhibition!"
