# **LUNA receives special distinction for innovation in aerosol packaging design at AEDA Aerosol Awards 2026**

June 15th, 2026

LINDAL Group is proud to announce that its innovative LUNA actuator has been recognised with a Special Distinction for Innovation in Aerosol Packaging Design at the AEDA Aerosol Awards 2026 on June 11th, organised by the Spanish Aerosol Association.

The award recognises LUNA's unique combination of user convenience, safety, sustainability and design excellence, reinforcing LINDAL's commitment to developing innovative dispensing solutions that create value for both customers and consumers.

LUNA was developed to address evolving consumer expectations for ease of use, safety and environmental responsibility while maintaining the high-performance standards expected from LINDAL products.

At the heart of the design is an integrated 35 mm twist-lock mechanism that incorporates an on/off function directly into the actuator. This innovative approach eliminates the need for a separate protective cap, creating a cleaner and more intuitive user experience.

The integrated locking system helps prevent accidental actuation during storage and transport while allowing consumers to quickly unlock and use the product when needed. The clearly audible 'click' confirms to the user the locking/unlocking operation, for an even smoother experience.

### Designed with sustainability in mind

Sustainability was a key consideration throughout the development of LUNA.

The actuator has been engineered using lightweighting principles, reducing material consumption without compromising functionality, robustness or user experience. By lowering the amount of plastic required, LUNA contributes to reduced resource use and lower carbon emissions associated with manufacturing and transportation.

The cap-free design further supports material efficiency by eliminating an additional plastic component. This point is becoming significantly relevant especially consider-

ing the emerging of the plastic tax across many European countries. Fewer components not only reduce material usage but also simplify product design and help improve overall packaging efficiency.

### **Versatility across multiple applications**

LUNA has been designed to be compatible with a wide range of aerosol applications and dispensing systems. Its adaptable design and colour customisation options allow brand owners to combine functionality, safety and visual appeal while supporting their sustainability objectives.

The actuator is suitable for a variety of markets, including personal care, household and technical applications, offering a premium user experience while helping brands reduce packaging complexity.

### **Recognition for innovation**

Receiving this distinction from AEDA highlights the industry's recognition of LUNA as a forward-thinking packaging solution that successfully combines design innovation with practical benefits.

The award reflects LINDAL's ongoing investment in product development and its dedication to creating dispensing solutions that meet the changing needs of customers, consumers and regulatory environments.

As the aerosol industry continues to evolve, LINDAL remains committed to delivering innovative, sustainable and user-focused solutions that help shape the future of dispensing technology.

We would like to thank AEDA and the award jury for this recognition, and congratulate everyone involved in the development and successful launch of LUNA.

### **About LINDAL Group**

LINDAL Group is a worldwide leader in the design, manufacture and sale of valves, actuators and spray caps used in aerosol products. The Hamburg, Germany-based company has more than 60 years of experience with innovative dispensing solutions for the cosmetics, household, pharmaceuticals, food and technical industries.

The LINDAL Group is represented by subsidiaries and licensees in more than 15 countries throughout Europe, Asia and The Americas. The company is renowned for its innovative designs, which deliver optimal functionality and return on investment. As a result, LINDAL packaging solutions are the choice of the world's most prestigious and trusted brands.
