# **LINDAL France Celebrates 50 Years of Innovation and Industrial Excellence**

Briey, France – June 11, 2026

LINDAL France marked its 50th anniversary on May 30, 2026, with a special celebration at its Briey facility, bringing together current and retired employees, their families, members of the LINDAL Group Executive Board, and selected partners involved in organising the event.

More than 400 participants attended the anniversary gathering, which honoured five decades of innovation, expertise, and shared success while highlighting the strong people-focused culture that has shaped LINDAL France since its creation in 1975.

Press release – LINDAL France Celebrates 50 Years of Innovation and Industrial Excellence

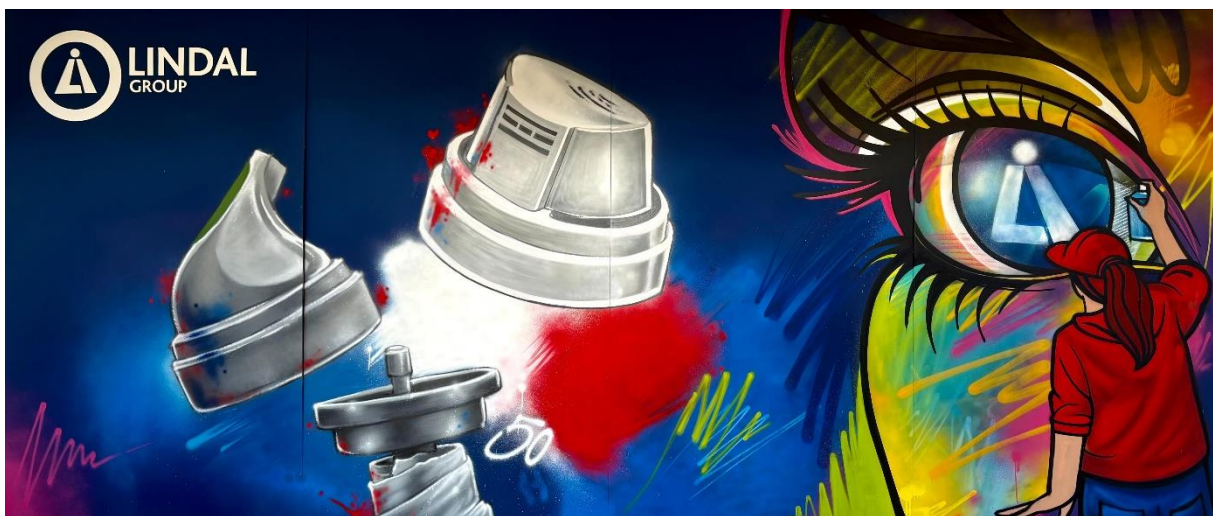

Guests were invited to discover the company's industrial know-how through guided factory tours led by employee volunteers. The tours showcased LINDAL's production technologies, innovation capabilities, and key areas of expertise developed at the Briey site over the past 50 years.

Today, the Briey facility employs approximately 270 people and has become the second-largest site within the LINDAL Group. It is recognised as a centre of excellence in mounting cup stamping and Bag-on-Valve (BOV) technologies. Since 2013, the site has also hosted LINDAL's Global Innovation Centre (GIC), dedicated to the development and testing of next-generation dispensing solutions.

During the celebration, LINDAL Group CEO François-Xavier Gilbert highlighted the strategic importance of the Briey site within the Group.

“Celebrating 50 years of LINDAL France is above all a celebration of people — especially the employees who have contributed to this remarkable journey,” said François-Xavier Gilbert, CEO of LINDAL Group.

A key highlight of the celebration was a collaborative mural created alongside graffiti artists Zurik and Laurent. Through interactive workshops, employees and their families explored the unique intersection between industrial innovation and artistic creativity.

The initiative highlighted LINDAL's long-standing connection with the international graffiti community, where its spray actuators are valued by artists for their precision and performance. The project symbolised how collaboration, creativity, and technical expertise can come together to transform aerosol technology into a genuine form of artistic expression.

More than a vibrant artwork, the mural carried a strong symbolic meaning. The eye featuring the LI logo represented LINDAL Group's vision and future ambitions, while the products showcased highlighted the industrial expertise of the Briey site.

Subtle French tricolour elements reflected the site's strong local roots and pride in its French industrial heritage, while the artist painting the mural paid tribute to the global graffiti community and LINDAL's enduring connection with artistic expression.

The event also featured interactive demonstrations linked to LINDAL technologies, presentations from the Global Innovation Centre, innovation quizzes, and a variety of family-friendly activities.

Employee involvement was at the heart of the celebration, with many volunteers guiding tours, supporting activities, and sharing their expertise with visitors.

Kashif Choudhry, LINDAL Group Marketing Manager and project lead for the anniversary celebration, paid special tribute to the many employee volunteers who helped bring the event to life:

“This celebration was a unique opportunity to open the doors of our workplace and share our passion and expertise with our families. I would especially like to thank all the volunteers whose energy, commitment, and enthusiasm played a key role in making this event such a success.”

Today, the Briey site continues to provide customers worldwide with advanced aerosol dispensing solutions for personal care, healthcare, household, food, and technical applications.
